

Reflections:

Going out of state is very expensive.

The higher the education the more expensive it becomes.

Careers dictated by educational level.

Stringent entrance requirements (i.e. high SAT/ACT scores)

Education is expensive more so as you achieve higher levels (i.e. 2 versus 4 year degrees)

Some colleges are renown for certain programs.

You can start with a 2 year degree and transfer to a 4 year.

2 Year colleges have a higher graduation rate.

Get what you pay for (quality of the education)

How expensive it really is.

How to get accepted and course requirements.
